

Introduction to Tracking Course  
Course Critique  
September 6/7, 2008  
Instructor: Dr. G.F. Ferri  
Survival in the Bush Inc.

The Introduction to Tracking Course was, a very professionally laid out program, Dr. Ferri was very passionate and knowledgeable instructor. The course was very detailed and you had to pay close attention to every detail, but this task was not a challenge, as Dr. Ferri constantly made the entire course very entertaining. Interest was never lost, there was always something new to learn, every moment of the course. Dr. Ferri was very accommodating in every way; if you had trouble with a certain aspect of the course he would be more than willing to help you out with a very detailed explanation. All the material in the course was easy to understand but still posed a definite and welcomed challenge. After only two days in the bush I felt that I came away with a very useful tool that would be extremely beneficial to the West Grey Police Service, and to me. I look forward to obtaining more useful tools such as the Introduction to Tracking Course in the future.

Regards,

Auxiliary Sergeant  
Ontario Provincial Police
